EDUCATION

Chandigarh University Mohali, Punjab
BE in Computer Science (AI & ML) 2023 – 2027
Current SGPA: 8.68 (3rd Semester)

DAV Public School, Hehal Ranchi, Jharkhand
Higher Secondary Education (CBSE) Passed in 2022

EXPERIENCE

Quarnex Remote
Web Development Tech Lead (Intern) Recent

- Led a team of 5 members in the successful delivery of over 7 web development projects.
- Gained hands-on experience in AI-powered web development, integrating intelligent features into web applications.
- Mentored junior developers and managed project timelines to ensure on-time delivery.

PROJECTS

Stock Manager — *Real-time stock management web app*

- A web-based platform that allows users to track, manage, and visualize their stock portfolios in real-time. Provides key insights such as portfolio diversification, performance trends, and profit/loss tracking.

Niti Suraksha — *AI-powered Fraud Detection System*

- Designed a web application to detect fraudulent insurance claims using machine learning algorithms. The system analyzes claim patterns to flag suspicious activities, helping to reduce losses.

Pneumonia Detector — *Deep Learning for Medical Imaging*

- Developed a deep learning model using CNNs to detect pneumonia from chest X-ray images. The system is designed to assist healthcare professionals by providing fast and accurate diagnoses.

BRIX — *AI-Powered Personal Automation Assistant*

- Developed a multi-functional AI assistant integrating local LLMs (Ollama, Mistral) with a CustomTkinter desktop application. BRIX features intelligent chat, document summarization, spreadsheet analysis, sheet monitoring with Telegram alerts, AI agent creation, and web search capabilities. Implemented persistent memory, natural language command execution, and automation with PyAutoGUI visualizations. Designed the system to be scalable, offline-capable, and adaptable for integration into custom Linux distributions.

RESEARCH

Plant Disease Detection Model

- Contributed to a research paper on a model that analyzes plant images pixel-by-pixel to detect diseases. The model compares images to a database of healthy and diseased plants to aid farmers in early detection.

ACHIEVEMENTS

CodeX 2.0 2025 Hackathon Winner *1st Place*
Developed a prize-winning application in under 36 hours focusing on Ai in future and productivity.

Top Performer Award *Quarnex Internship*
Recognized for outstanding leadership and project delivery during the web development internship.

SKILLS

Languages: Python, C++, C, JavaScript, TypeScript, SQL
Web Technologies: Next.js, React, Express.js, HTML5, CSS3, Tailwind CSS, Prisma, Zustand
Databases & Tools: MongoDB, Redis, Supabase, Firebase, Postman, Git & GitHub
AI / ML: TensorFlow, Neural Networks, Machine Learning, Data Analysis
